

Burgundian Abbey founded at Cluny the reform movement that began to enliven the Roman Church in the 10th Century had its roots in the renewal of monasticism and the founding of new monastic houses in northern Europe. Of these, the most illustrious was founded by Berno at Cluny in Burgundy, in 910 with a great abbey church surpassed in the West only by

St. Peters in Rome. The monastery was, from its
origins, free of lay supervision.

The Abbey church at Cluny, once
the largest in the World, was destroyed
during the French Revolution.
